

Cristian David Moreno Riaño

Senior Full Stack Web Developer

Villavicencio/Colombia | +573022539479 | kyonax.corp@gmail.com | [Linkedin](#) | [Github](#) | [Personal Web](#)

Senior Full Stack Web Developer with 7 years of experience delivering **scalable, adaptable, and high-performance** digital solutions for national and international clients. Specialized in designing and implementing both **frontend experiences and backend architectures**, ensuring seamless integration, maintainability, and performance. Recognized for self-management, adaptability, and effectiveness in remote work environments.

EXPERIENCE

2023-2025 **Softtek** Remote - Bogotá D.C
Senior Software Engineer (Full Stack Web Developer)

- Migrated an internal admin platform into a fully functional e-commerce site using **Shopware (Symfony - Vue.js)**, automating the customer purchase flow and enabling a smoother, more adaptable sales process.
- Designed reusable **SASS/SCSS** patterns, mixins, and a modular architecture to optimize performance, scalability, and maintainability across the whole e-commerce platform. Integrated **PostCSS** to handle cross-platform browsers.
- Delivered **UI/UX refinements** and implementing frontend adaptations within **Shopware's OOB constraints**, ensuring consistency and feasibility. Documented components and patterns for faster onboarding.
- Built and standarize **CI/CD pipelines in Azure DevOps** with automated testing and PR validation for backend services. Managed deployments for **staging/dev/production** environments using **Docker and docker-compose**.
- Onboarded and mentored engineers with **technical walkthroughs, documentation, and PR reviews**.
- Designed and optimized **REST and GraphQL APIs** consumed by the frontend and external services, ensuring high performance, reliability, and maintainability.

2021-2023 **Cabeza Rota** Remote - Villavicencio/Meta
Senior Full Stack Web Developer

- Developed **e-commerce sites, landing pages, and microservices** using **Next.js, React.js, Vue.js, Node.js, Nest.js**, and **Symfony (PHP)** with SSR/SSG/ISR patterns and real-time **WebSockets**.
- Built backend services with **GraphQL/Apollo** and **REST APIs** connected to **PostgreSQL, MySQL, and MongoDB**.
- Implemented **authentication flows (JWT), caching layers, and query optimizations** for database performance.
- Improved digital brand presence with robust **UI/UX** implementations validated through **A/B testing** used analytics (**GA4, Hotjar**) and **funnels/heatmaps** to iterate on design and increase engagement.
- Established **CI/CD pipelines** with **Docker + GitHub Actions**, integrated **unit/integration testing (Jest, RSpec)**, and enforced PR review standards.
- Translated **UI/UX** mockups, templates into dynamic, responsive, and user focus frontend implementations, aligning with the expected business goals.

2021-2021 **Cabeza Rota** Remote - Villavicencio/Meta
Digital Marketing & Web Developer

- Improved data collection and insights for clients marketing campagins by implementing **A/B Testing**, with tools like **GA4 and Hotjar**, refining websites components and designs for stronger engagement and conversion tracking.
- Developed optimized frontend solutions using **Next.js, React.js, Vue.js, Nest.js, Redux, SASS/SCSS, Tailwind, Bootstrap, and Wordpress** to deliver fast and scalabale projects with well structured user flows experience.
- Designed and Implemented reusable, maintainable **custom components** aligned to project requirements, design and technology.

2020-2021 **Cabeza Rota** Remote - Villavicencio/Meta
Growth Marketer & Web Developer

- Drove brand awareness and engagement on **Twitter, Instagram, Discord** and **YouTube** by executing targeted growth strategies increasing online presence, follower engagement, and customer acquisition.
- Designed and deployed **VPS environments** using **AWS EC2** instances, configuring **Linux servers (Ubuntu/CentOS)** with **Apache, PHP, and MySQL** to host backend apps.
- Integrated **Cybersource and PayU** payment services, automating order/checkout flows.
- Optimized user flows by implementing **custom components, custom elements, and custom hooks**, to improve website's functionalities, to deliver faster rendering websites.

- Optimized database performance via **query optimization, data schemas, and caching.**

2017-Present

Zerønet Labs

Remote - Villavicencio/Meta

Founder & Lead Full Stack Engineer

- Developed frontend applications with **React.js, Next.js, Vue.js, Webpack, Vite, Gulp.js, Grunt.js, and Vanilla JS (HTML5, SASS/SCSS, ES6+)**, delivering optimized responsive websites for multiple startups or medium companies.
- Built **backend systems, REST/GraphQL APIs, microservices**, and automation services with **Node.js, Express, Nest.js, Symfony (PHP), TypeScript, Python**, and **PostgreSQL/MySQL/MariaDB**.
- Created reusable **npm packages and UI libraries**, applying strong design patterns across **React, Vue**, and **Next.js**. Automated publishing workflows using **semantic-release** and CI (GitHub Actions).
- Containerized environments with **Docker, docker-compose** and configured pipelines for **multi-stage deployments**.
- Builds automated Discord bots and backend services with **Python, Typescript, MySQL, and MariaDB**, improving server navigation and customer data accessibility.
- Experimented with backend-oriented performance optimizations, including **caching strategies, database replication, and API rate limiting** to ensure stability under load.

SKILLS & TOOLS

HTML/HTML5	CSS3/CSS	SASS/SCSS	React.js	Next.js	Vue.js
Nuxt.js	Preact.js	Tailwind	Bootstrap	AntDesign	Styled Components
Redux	Zustand	Recoil	Context API	Webpack/Turbopack	Vite/Babel
Grunt.js	Gulp.js	PostCSS	Material UI	npm/bun	semantic-release
Jest	Unit/Integration	Node.js	Nest.js	Express.js	Symfony (PHP)
TypeScript	Python	PostgreSQL	MySQL/MariaDB	MongoDB	REST/GraphQL/Apollo
WebSockets	SSR/SSG/ISR	API Security	JWT	API Patterns	Caching Strategies
Docker	docker-compose	Kubernetes	AWS EC2/Lambda	Azure DevOps	GitHub/GitLab CI
CI/CD	Logging/Monitor	Documentation	PR Reviews	Architecture	Wordpress/Shopware
Cybersource	PayU	Payment APIs	E-commerce	Order Automation	Analytics (GA4/Hotjar)
A/B Testing	Funnels	Heatmaps	User Flows	Lazy Loading	Code Splitting
AVI/WEBP	Caching Strategy	Analytics-driven	Leadership	Mentoring	Agile/SCRUM
Javascript Typescript PHP Python Bash Scripting Powershell Scripting					

EDUCATION

2021

Caldas University

Villavicencio/Meta

Diploma in Basic Programming Skills - Mision TIC 2022

2018-2020

Universidad de Los Llanos

Villavicencio/Meta

Systems Engineer - Relevant Completed Subjects: *Fundamentals of Programming - Introduction to Systems Engineering - Logical Thinking - Data Structures - Science, Technology, and Development*
